4. First aid measures

4.1 Description of first aid measures

If inhaled: Remove person to fresh air. If signs/symptoms continue, get
medical attention. 
Keep patient warm and at rest. 
If unconscious, place in recovery position and seek medical advice. 
Keep respiratory tract clear. 
If breathing is irregular or stopped, administer artificial respiration. 

In case of skin contact: Remove contaminated clothing. If irritation develops, get medical attention. 
In case of contact, immediately flush skin with plenty of water. 
Wash clothing before reuse. 
Thoroughly clean shoes before reuse. 

In case of eye contact: Rinse immediately with plenty of water, also under the eyelids, for at least 10 minutes. 
If eye irritation persists, consult a specialist. 

If swallowed: Move the victim to fresh air. 
If unconscious, place in recovery position and seek medical advice. 
Keep respiratory tract clear. 
Do not induce vomiting without medical advice. 
Never give anything by mouth to an unconscious person.

### 8.2 Exposure controls

#### Engineering measures
Maintain air concentrations below occupational exposure standards.

#### Personal protective equipment
- **Respiratory protection**: Not required; except in case of aerosol formation.
  - Filter type P
- **Hand protection**: For prolonged or repeated contact use protective gloves.
The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it. The breakthrough time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. In case of contact through splashing:

- Nitrile rubber
  Protective index Class 1

Eye protection: Tightly fitting safety goggles
Hygiene measures: Wash face, hands and any exposed skin thoroughly after handling.

Protective measures: The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place.

Environmental exposure controls
General advice: Do not allow contact with soil, surface or ground water. If the product contaminates rivers and lakes or drains inform respective authorities.
