ForTorque® Options

A wide range of accessories and options complete the ***ForTorque®*** kit.

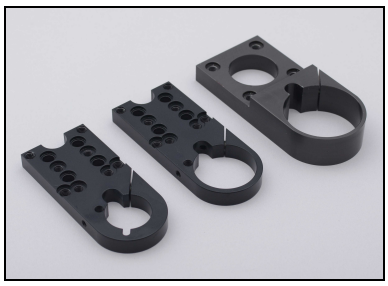

The following options are available for *ForTorque®* servo-electric swivelling-rotary modules.

					
Type	**FT01-1643 FT01-2043**	**FT01-2520 FT01-25L20**	**FT01-3518 FT01-35L18**	**FT01-4550**	**FT01-4050 FT01-5050**
clamping flange for HighDynamic® modules		•	•	•	
adaptor for HighDynamic® modules					•
clamping flange for 90° wall mounting		•	•	•	
clamping flange for QuickLab® modules	•				
home switch & cam set		•	•		
special grease-filling for low temperature applications				•	•
mechanical stop set for angle of rotation limitation				•	
connector flange fitting 25 mm grid		•			
clamping flange to combine two ForToque® modules		•	•		
FlowTorque® fluidic rotary joints 2-channels for pneumatics or 1 channel for vacuum					•
FluxTorque® electric rotary joints 5-channel signals					in advance
Motor Connector 90° angled & rotatable				•	

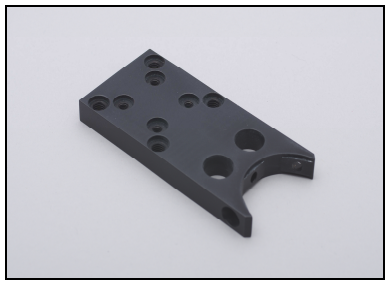

The combination of several options requires technical examination. Please inquire and we will review the technical feasibility of your demands.

When ordering a *ForTorque®* swivelling-rotary module with the option 'completely assembled', the option will be mounted by us, as shown in the photos on following pages.

JUNG ANTRIEBSTECHNIK U. AUTOMATION GMBH ♦ Felsweg 18 ♦ 35435 Wettenberg Germany

AD12
clamping flange suitable for HighDynamic® HM01 modules

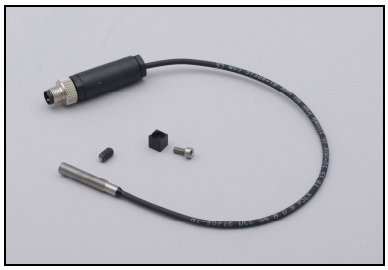

AD12
adaptor suitable for HighDynamic® HM01 modules

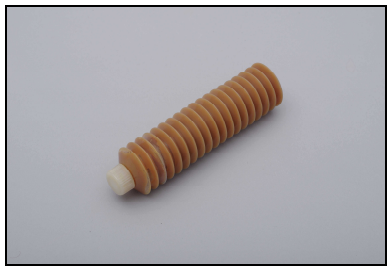

AD13
clamping flange for 90° angular mounting

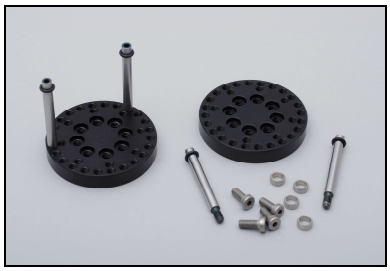

AD16
clamping flange for connection of two ForTorque® modules

AD14
home switch & cam set

AD26
grease filling for low temperature applications

AD27
mechanical stop set for angle of rotation limitation (only FT01-45)

AD28
connector flange fitting 25 mm grid (only FT01-25)

/FW01
fluidic rotary joints 2-channels for pneumatics or 1-channel for vacuum

electric rotary joints 5-channels (on demand)
